

Dear Elders,

Allow us to tell you a story. Again.

THE STORY OF

# Rōōmies

narrated by  {cleverCODE}  
THOUGHTFUL WEB

let's recap

the vision

Roomies is a task & expense management application  
for people living with other people.

the scope

## **landing page**

Welcomes the user to the site. Makes them feel comfortable.

## **cork board**

Central hub for everything a person will use on the site.

## **task/expense pages**

Simple forms for adding or modifying tasks & expenses.

## **achievements page**

Overview of the user's and their roommate's achievements

things you said

integrating with **facebook login**

managing many **achievement types**

being able to **negatively affect** another roomie

verifying a task or expense has been **completed**

**nesting tasks** within other tasks

handling achievement system **abuse**

assigning tasks to people **without their consent**

**extending roomies** for families & relationships

return on investment

**\$36,480** is our break even

250 users/month for 9 months

a database of **desirable roommates**. roarrrr...

**skills & knowledge** to do what we love

a **useful product** to help us get an amazing job

experience with **software as a service**

Plan	Price
Single player	Freeness
Twoomies	\$9/each
Threeezies	\$7/each
Fourwesome	\$5/each

Out of **20** users

Plan	Pricing	# of Houses	Gross \$\$
Single player	Freeness	?	\$0
Twoomies	\$9/each	2	\$36
Threeezies	\$7/each	4	\$84
Fourwesome	\$5/each	1	\$20

Total gross: **\$140**

If we reach **100 users**, total gross around : **\$750**

the campaign

not that campaign!

# the roomies campaign

## **marketing**

beta subscriptions

twitter

facebook

## **search engine optimization**

marketing

standards compliant code

productivity blogs

and what about costs?

based on 100 users

### Yearly fees

SSL Certificate: \$100

Domain Name: \$10

### Monthly fees

Hosting: \$100

Payment Gateway: \$50

HTTPS: \$20

**Total: \$180-ish per month**

# roomies invites

Beta testers all receive one invite each.

At the end of each month, the roomies with the most points will receive another invite.

## Why?

- Scaling costs

- Exclusivity

- Envy

the information

Roomies makes living together easy.

## Phase 1

Task & expense management tool

Achievement system

## Phase 2

Social networking

Integrating with cleverCode's Homies app

what's next?

Design & structure

Server-side development

Client-side development

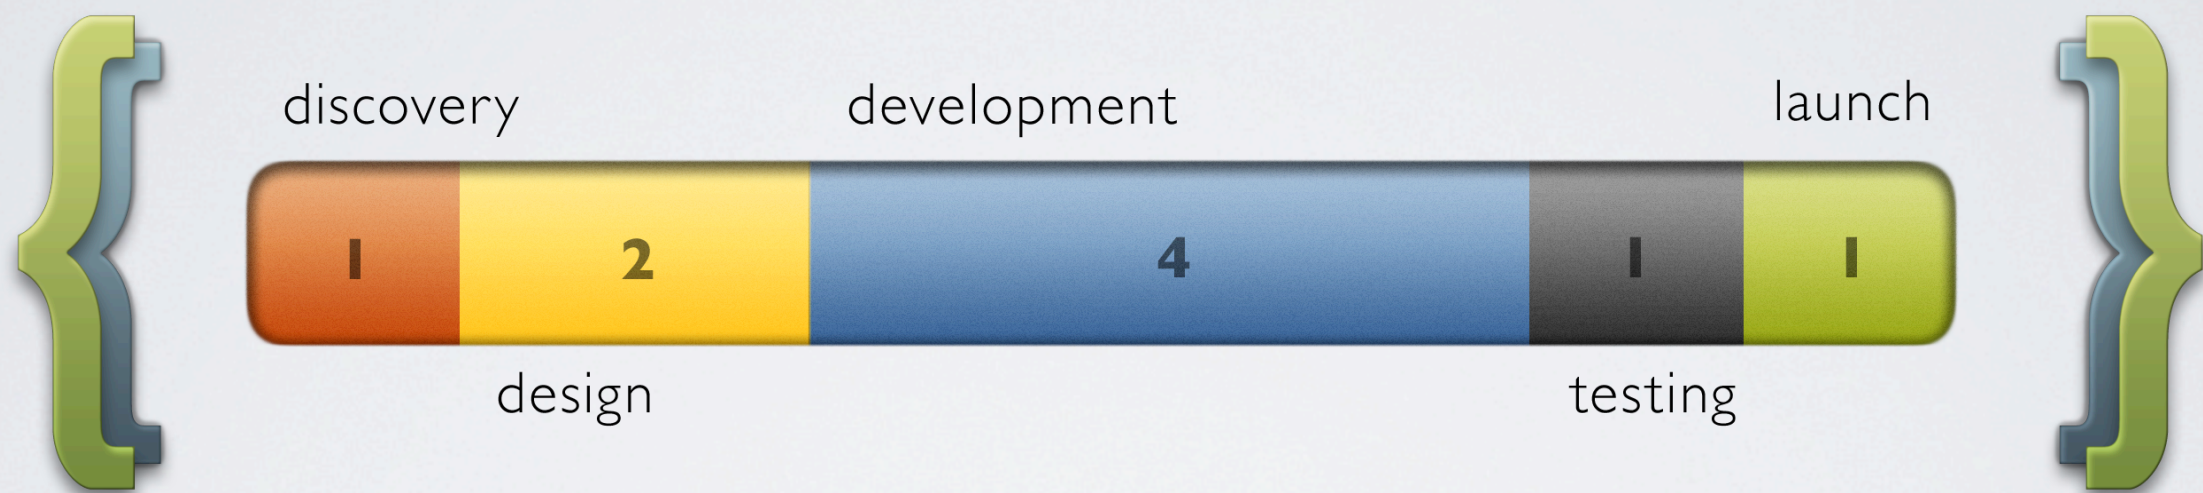

Alpha launch

Beta launch

Soft launch

Phase 2
